AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Withdrawn) A system comprising:

A television having a screen;

A set-top box coupled to the television, the set-top box including:

A receiver;

A processor coupled to the receiver to receive signals as received and translated by the receiver;

A video controller coupled to the processor and coupled to the television, the video controller to receive commands from the processor and translate those commands to signals, the signals sent to the television to control the screen; and

A remote control, the remote control including:

A housing having an aperture;

A sensor within the housing, coupled to the housing at a location within an optical path from the aperture;

A microcontroller electrically coupled to the sensor and coupled to the housing; and

A transmitter electrically coupled to the microcontroller and coupled to the housing.

2. (Withdrawn) A method of manipulating a cursor on a tv screen utilizing a wireless remote control comprising:

Detecting a location on the screen pointed to by the remote control; and Transmitting the location to a set-top box.

(Withdrawn) The method of claim 2 further comprising:
 Displaying a cursor at the location.

Appl. No. 09/844,642 Amdt. Dated September 20, 2005 Reply to Office Action of May 19, 2005

4. (Withdrawn) The method of claim 3 further comprising:

Moving the remote control to a position pointing to a new location on the screen;

Detecting the new location; and

Transmitting the new location to the set-top box.

5. (Withdrawn) The method of claim 2 further comprising:

Moving the remote control to a position pointing to a new location on the screen;

Detecting the new location; and

Transmitting the new location to the set-top box.

6. (Withdrawn) The method of claim 4 further comprising:

Displaying the cursor at the new location.

7. (Withdrawn) A method of manipulating a cursor on a tv screen utilizing a wireless remote control comprising:

Receiving a grab of the cursor, the cursor pointed to by the wireless remote control;

Transmitting an indication of the grab to a set-top box coupled to the tv screen;

Receiving an indication of motion of the remote control; And

Transmitting the indication of motion of the remote control to the set-top box.

8. (Withdrawn) The method of claim 7 further comprising:

Displaying the cursor at a location determined based on the indication of motion of the remote control.

9. (Withdrawn) The method of claim 8 wherein:

The indication of motion is an indication that a sector boundary has been crossed.

10. (Withdrawn) The method of claim 8 wherein:

The indication of motion is an indication of a location pointed to by the remote

Appl. No. 09/ 844,642 Amdt. Dated September 20, 2005 Reply to Office Action of May 19, 2005

control different from a location of the cursor when the indication of the grab was transmitted.

11. (Withdrawn) A remote control device comprising:

A housing having an aperture;

A sensor within the housing, coupled to the housing at a location within an optical path from the aperture;

A microcontroller electrically coupled to the sensor and coupled to the housing; and

A transmitter electrically coupled to the microcontroller and coupled to the housing.

12. (Withdrawn) The remote control device of claim 11 wherein:

The transmitter is an infrared transmitter.

- 13. (Currently Amended) The A remote control device of claim 11, further comprising:
 - [[A]] a housing having an aperture;
- [[A]] a sensor within the housing, coupled to the housing at a location within an optical path from the aperture;
- [[A]] a microcontroller electrically coupled to the sensor and coupled to the housing;
- [[A]] a transmitter electrically coupled to the microcontroller and coupled to the Housing housing;
- [[A]] <u>a</u> semi-mirror coupled to the housing and disposed within the optical path from the aperture between the aperture and the sensor; <u>and</u>

And

[[A]] a light source coupled to the housing and disposed in a position relative to the semi-mirror suitable for emitting a light beam targeted at the semi-mirror which, upon reflection by the semi-mirror, follows the optical path from the semi-mirror to the aperture.

Appl. No. 09/ 844,642 Amdt. Dated September 20, 2005 Reply to Office Action of May 19, 2005

- 14. (Currently Amended) The remote control device of claim 13, further comprising:

 [[A]] <u>a</u> first focus element disposed in the optical path between the semi-mirror and the aperture.
- 15. (Currently Amended) The remote control device of claim 14, further comprising:

 [[A]] <u>a</u> second focus element disposed in the optical path between the semi-mirror and the first focus element.
- 16. (Currently Amended) The remote control device of claim 15 wherein:

The the light source is a laser LED;

The the first focus element is a blind; and

The the second focus element is a blind
